

miniPOS Cube

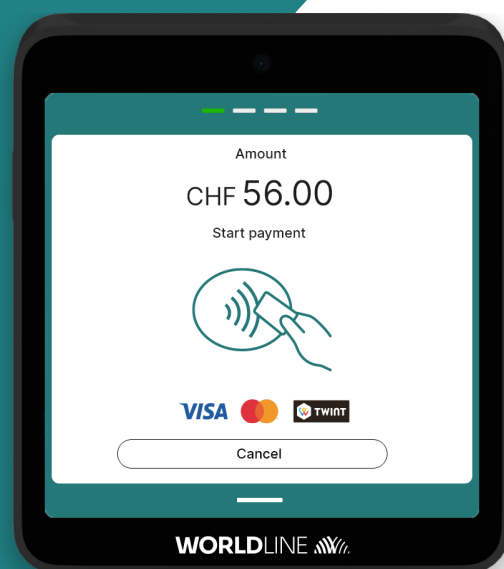

The compact payment solution for stress-free payments

Rely on maximum mobility when accepting payments with miniPOS Cube. The handy terminal lets you take payments wherever your customers are.

The ultra-compact, portable miniPOS Cube supports businesses of all sizes. Thanks to its pocket-friendly modern design, the Cube is always ready to use and supports fast, reliable transactions, even during periods of high customer volume.

With a modern Android operating system and reliable hardware, payment processing runs fast and simple for your business. Whether customers pay contactless or by QR code, all payments are processed securely, with receipts sent digitally via QR code for a completely paper-free experience.

Cube combines maximum mobility with reliable payment technology and offers a flexible payment processing solution for day-to-day operations.

**Compact, lightweight with many benefits**

- Modern terminal operating on Android OS
- Flexibly connectivity via 4G or WiFi
- Digital receipt via QR Code
- Fast payments thanks to contactless function
- Latest security standard: PCI PTS 7.x
