Mobility Marketplace

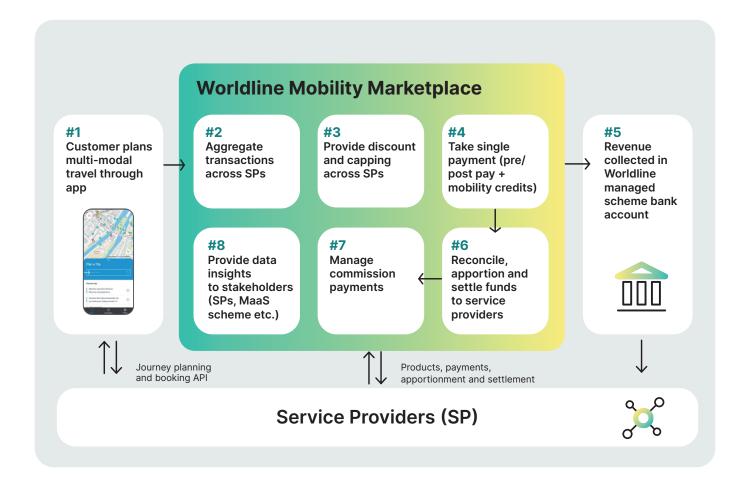

Enabling Mobility as a Service.

Mobility Marketplace

Enable a simple customer experience in a complex payment environment with multiple operators.

Our Mobility Marketplace platform provides the glue of any multi-operator integrated payments solution. It manages the end-end payment processing for all transactions to ensure customers have a seamless payment experience and all mobility service providers and transport operators have a trusted revenue collection process.

Key Features of Mobility Marketplace

Core components for delivering a leading edge MaaS platform for the consumer

Robust financial processing, automating the reconciliation, apportionment & settlement of funds across service providers

API first providing simple and easy of integration

Built on established and trusted financial SaaS platform

Generates new value for operators, authorities and the customer through insights from consolidated data
