

Worldline Digital Identity Hub

Simplify digital identity adoption

The eIDAS 2.0 deadline is around the corner ... is your bank ready?

The Worldline Digital Identity Hub is a ready-to-use solution for banks to effortlessly meet eIDAS 2.0 requirements. It absorbs the complexity of the EU Digital Identity Wallet ecosystem — so your organisation doesn't have to.

Benefit from a solution built on proven hub expertise and hosted in our own European data centres that scale with your ambitions, so you meet the December 2027 deadline with confidence.

One hub for the entire European Digital Identity Ecosystem

Compliant
Be effortlessly eIDAS 2.0 compliant and remain so.

Future-ready
Get the ability to monetise your data.

Interoperable
Take advantage of one single connection to all wallet providers and trusted lists.

Scalable
Remain cost effective while adapting from light adoption to industrial-scale traffic.

Why choose Worldline?

- **Meet the deadline with ease:** Worldline's extensive involvement in Large-Scale Pilots and collaboration with wallet providers keeps us ahead of deadlines — and means we stay aligned as the regulation evolves.
- **Master an ever-changing ecosystem:** managing evolving specifications and 27 wallets from different Member States is complex. With one single connection to Worldline Hub, you get access to them all — for a frictionless, interoperable, always up-to-date experience.
- **Leverage Worldline's proven expertise:** we bring you decades of payments experience, a deep European footprint, and a demonstrated track record in deploying and scaling financial projects across Europe.
- **Be ready to monetise:** transform your data into a revenue-generating asset thanks to Worldline's built-in invoicing and settlement capabilities.
