

Worldline Hospitality Suite

THE PMS INTEGRATED OMNI-CHANNEL SOLUTION FOR EUROPE

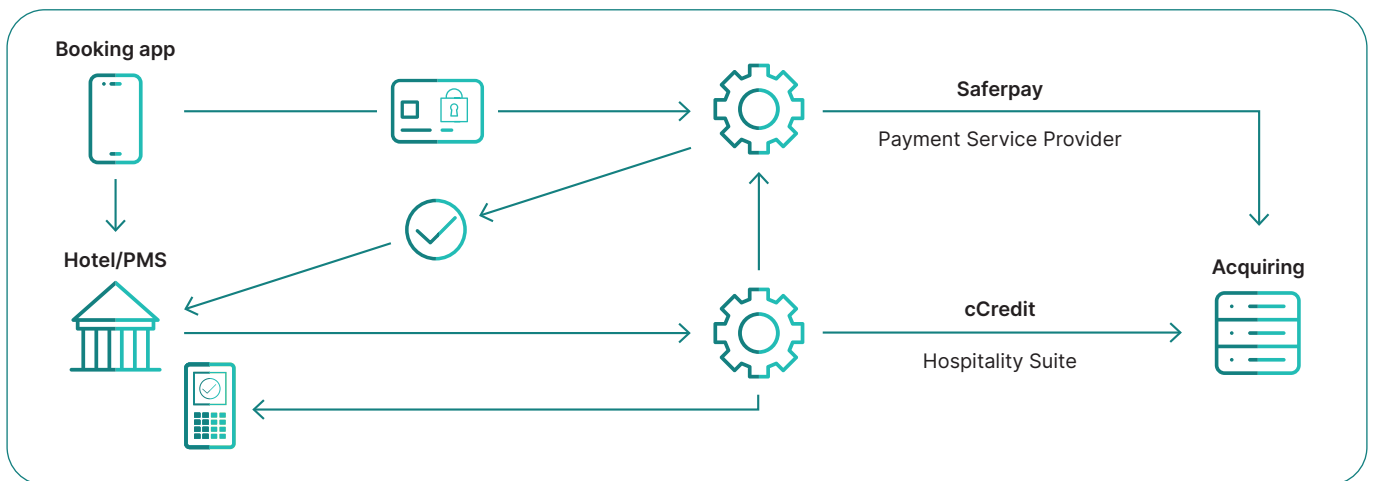

From booking to checkout: the Worldline Hospitality Suite easily and securely combines all of your payment processing requirements. The pms integrated omni-channel solution for hotels amalgamates all payments throughout europe and across all channels.

IT'S THAT SIMPLE

The Hospitality Suite consists of the payment solution cCredit, card acceptance, reporting and, if applicable, the payment service provider Saferpay for your omni-channel business. An interface connects the hotel's property management system (PMS) to the Worldline payment solution. This seamless connection between the systems simplifies all hotel-specific processes, from the reservation to the check-in and check-out, thus preventing incorrect entries. The automated data transmission also reduces the administrative work for the reception desk and for the accounting department. All common payment methods, whether domestic or international, are accepted.

THE BENEFITS INCLUDE

- More efficient payment procedures and processes
- All common debit and credit cards accepted
- Extended functions for the hospitality sector such as
 - Advance reservations
 - Reservation adjustments
 - Reservation cancellations
 - Subsequent billing (Late charge/No show)
- Features such as DCC or myPortal
- PCI compliance
- Lower administrative costs
- Worldline as a central service provider for on-site and online payment solutions, acquiring, uniform and transparent reporting as well as many other additional functions.

SIMPLE, SECURE AND SEAMLESS CONNECTION OF ALL SALES CHANNELS

For example, if a room is reserved online, the payment information is encrypted via the Payment Service Provider (PSP) Saferpay and transmitted to the hotel's PMS using a token.

When the customer checks out, the hotel system triggers payment via the payment solution using the stored token. It is not necessary to present the card again.

All payments are processed centrally via the acquiring services of Worldline. Reservations and sales flow together seamlessly in one system.
