

VALINA

The next generation of unattended terminals

The vending machine terminal represents the latest generation of all-in-one terminals and is suitable for kiosks, vending machines and other indoor and outdoor installations.

The compact unattended terminal combines NFC, chip card reader and magnetic stripe reader in one single powerful device and is therefore the perfect space-saving solution. With its elegant, modern design and appealing user interface.

VALINA leverages the user experience to a new and higher level.

The touch display and the attractive user interface allow the customer a convenient and smooth payment process, all standard credit and debit cards as well as all leading apps for mobile payment are supported.

A reliable solution

VALINA offers many advantages and is the optimal solution for your needs:

- Installation format meets EVA standard
- Android-based platform supports value-added services and third-party business applications
- PCI PTS 5.x security standard
- ep2 certified
- Vandal-proof/water- and dust-proof (IK 09 & IP 65 certified)
