

KEEP AN EYE ON YOUR SALES REVENUES

As the perfect complement to reliably processing cashless payments on-site and via e-commerce, SIX Payment Services offers you an extensive portfolio of customised reporting tools.

You can easily create an overview of your transactions and crediting. SIX Payment Services provides you with the right equipment for both.

REPORTING TOOLS

myPortal

Your free online access to statements. With myPortal you receive online access to details of all SIX Payment Services card transactions and payments statements.

Get an overview of your cashless transactions. myPortal is for free and provides you with all the information about transactions payout by SIX Payment Services, details concerning any applicable fees and other important information about your terminals. This enables you to conduct a financial reconciliation between the amounts credited and your accounts. myPortal is available throughout Europe and can be used in ten languages.

MRX

Simplify your financial reconciliation and enter your transactions automatically with the electronic credit notice.

MRX (Merchant Reconciliation XML) is an electronic credit notice and facilitates the reconciliation of all sales from card transactions via SIX Payment Services with your accounting. The generic XML file will be provided to you daily (except for Sundays) in a SFTP mailbox. The XML file can be easily processed and facilitates automatic financial reconciliation between the crediting and your accounting.

topas PMS

Monitor all transactions with the digital finance management system, topas PMS – even those from other acquirers in Switzerland.

topas PMS is a fee-based finance management system, which enables you to maintain an overview of all credit, debit and customer card transactions in your company. topas PMS unites card brands such as Mastercard, Maestro, Visa or TWINT as well as American Express and PostFinance. You can use the topas Connector and FibuSync interfaces to transfer all payment data directly to your accounting system. Making manual comparison of individual card transactions and accounting records a thing of the past.
